**Last Updated:**

*State:* TX *Region:* South End *Beach:* Boca Chita

*Summary:* Many isolated mats of Sargassum identified as they enter approach

*Winds:* 12 – 14 mph NNW

*Current:* 0.25 – 0.5 mph W

*Net Drift:* 0.4 mph SW

*Forecast:* Much of the Sargassum located in the southern regions is making its way through a series of gyres and eddies, slowing its approach toward the coastline.
